Cyclonic Weather

Hurricane

Tornado

Air Pressure
HIGH or LOW

Surface Wind Direction

Hurricane Information
Scale: _________________________
Wind Speed: ___________________
Energy Source: _________________

Tornado Information
Scale: Fujita Scale
Wind Speed: _________________
Energy Source: rapid rising hot air

Question:
What happens to wind velocity as air pressure decreases?
________________________________________

Question:
What prevailing winds are responsible for moving weather systems to the northeast above 30° N latitude?  ________________________________
